Colorado Springs, CO 80915
USA
Certified in Solar Electric

GEO's PV (Solar Electric) Terms & Conditions (Rules)

Contractors are required to apply for renewable energy system rebates on behalf of their residential customers.

Residential customers are defined as residential homeowners and landlords. Residential and commercial rebate allocation determined by electricity rate type.

Residential rebates are available for Colorado residents only.

Applicants must own the system and contract with a company listed on the GEO Service provider List. Systems leased from a third party are ineligible for the rebates.

An energy audit is required and must be performed on or after January 1, 2007; audits performed after April 19th, 2010 must be performed by a BPI / RESNET certified auditor.

Renewable system rebates are for new installations, using new equipment only. The rebate is not valid on system add-ons, expansion or systems with used components.

Renewable Energy installations on new home construction are permitted provided that the new construction is either an ENERGY STAR New Home or the new construction has a HERS rating of 80 or less by the time the system installation is complete. An energy audit is not required for qualifying new homes.

The PV panels must be installed at a tilt and azimuth designed to meet a minimum of 90% of the optimum orientation output.

The residential customer agrees to maintain the system free and clear of shade between 9 am and 3 pm.

Inverters must be UL listed and approved

The system must be grid-tied and requires a 5 year warranty on the panels, inverter, and installation.

Installation must be in compliance with all local and state ordinances. Proper permits are required. Utility net metering, interconnection and REC purchase agreements are required.

Applications are limited to one rebate per rebate system type per address.

Rebates are available on a first come, first served basis until funds are exhausted.

Local incentives may be available for PV and will be used to determine the Governor's Energy Office rebate amount. The rebate paid by the Governor's Energy Office will not exceed \$1.50 per DC watt for the first 3kW for the GEO standard statewide offer. Partner territories include a higher incentive. This rebate is calculated with the assumption the residential applicant will apply for and claim all available local incentives and the total combined incentives will not exceed the state cap set forth of \$3.00 per DC watt for the first 3kW.

Products and services undertaken for this rebate must be in accordance with the National Historic

Preservation Act; for more information on the Act, visit <http://www.nps.gov/history/locallaw/nhpa1966.htm>

Rebate funds are reserved for an applicant once the complete Part 1 of the application is received, reviewed and approved; an approval letter will be issued if funds are available.

Failure to submit the proper paperwork within the stated application deadlines will result in the loss of the rebate reservation. If any of the program requirements are not satisfied, the residential applicant forfeits rights to the rebate.

Approved rebate applications will receive a rebate check, issued in the name of the residential applicant. Checks will only be mailed to a PO Box if a physical street address is provided.

The rights to a rebate or a rebate application may not be transferred or sold.

No term or condition of this application contract shall be construed or interpreted as a waiver, express or implied, of any immunities, rights, benefits, protections, or other provisions, of the

Colorado Governmental Immunity Act, CRS §24-10-101 et seq., or Federal Tort Claims Act, 28 U.S.C. §§1346 (b) and 2671 et seq., as applicable now or hereafter amended.

Fraud of any type could result in federal prosecution under the US mail fraud statutes. Any misrepresentation or fraudulent information disqualifies the rebate and may give rise to criminal or civil prosecution.

The Governor's Energy Office, State of Colorado and their partners are not responsible for lost, late, damaged, illegible, misdirected or postage due applications. All rebates shall be governed by applicable state and federal laws. Resolution of any disputes will be governed by Colorado law. All terms, conditions and rules of the program are subject to change.

The Governor's Energy Office, State of Colorado and their partners are not responsible for loss or damages created by the contractor selected by the application to complete the system installation.

The GEO reserves the right to inspect and verify all installations.

Please allow up to 4-6 weeks for delivery of the rebate after installation of the system and receipt of all required paperwork. If the residential applicant has not received the rebate check after 6 weeks of submitting PART II paperwork, they may visit www.RechargeColorado.com or call 1-800-462-0184.
