USA
Certified in Solar Electric

New GEO Solar and Wind Rebates *help you save money*

In addition to the 30% federal tax credit for solar electric, solar thermal and wind systems, starting April 19, 2010 the Governor's Energy Office (GEO) is offering rebates for solar electric, solar thermal, and wind systems. The GEO rebates you qualify for depend on which utility territory you are located in. You may be eligible for:

Residential:

Solar Electric Systems: the GEO is offering \$1.50 / Watt up to 3kW (\$4,500).

Solar Thermal Systems: the GEO is offering \$2,000 plus \$45 / kBtu over 23,000 BTU/day up to \$3,000.

Wind Systems: the GEO is offering \$1/Watt up to 5kW plus \$.50/Watt up to 10kW.

Commercial:

Solar Electric Systems: the GEO is offering \$1.50 / Watt up to 10kW (\$15,000). Systems may not exceed 25kW.

Solar Thermal Systems: the GEO is offering 30% of the total system cost up to \$15,000.

Wind Systems: the GEO is offering \$1/Watt up to 15kW (\$15,000). Systems may not exceed 30kW.

Additional Rebates From GEO Partners

Some utilities are offering rebates to be used in conjunction with the GEO rebates. The combination of GEO and partner funds may not exceed:

Solar Electric Residential - \$3/Watt up to 3kW

Solar Electric Commercial - \$3/Watt up to 10kW

Solar Thermal Residential - \$4,000

Solar Thermal Commercial - 30% of the total system cost not to exceed \$30,000

Wind Residential - \$2/Watt up to 5 kW plus \$1/Watt up to 10kW

Wind Commercial - \$2/Watt up to 15 kW for commercial wind.

For example, Mountain View Electric is matching the GEO rebates for residential solar electric and wind systems so that the total amount available to customers in Mountain View Electric's territory is \$3/Watt up to 3kW for solar electric, and \$2/Watt up to 5kW plus \$1/Watt up to 10kW for residential wind. No Mountain View Electric rebates are available for solar thermal in the Mountain View Electric territory, but GEO rebates are available for solar thermal systems.

Utilities & Cities Offering Rebate Funding in Partnership with At Least Some of the GEO's Rebates Include

Agency	PV-Res	PV-Com	SDHW	SHW-Com	Wind-Res	Wind-Com
San Miguel Power Association	X	X			X	X
City of Glenwood Springs (Glenwood Electric)	X	X				
Delta-Montrose Electric Association	X		X			
Mountain View Electric Association	X				X	
Southeast Colorado Power Association	X				X	
Grand Valley Power	X					
Highline Electric Association	X					
Town of Estes Park	X					
Colorado Springs Utilities			X	X	X	X
City of Aurora			X	X		
City of Fort Collins			X	X		
La Plata Electric Association			X			

Colorado Springs Utilities currently has thermal and wind rebates and may receive additional funds for solar electric rebates.

If you live in either the [Black Hills Energy](#) utility territory, or the [Xcel Energy](#) utility territory, your solar electric rebates will be limited to the rebates offered by your respective utility. The only GEO rebates you will be eligible for are for Solar Thermal and Wind systems.

[Black Hills Energy](#): Residential systems up to 10KW receive \$2.50/watt. For further information including commercial rebate programs go to <http://blackhillspv.programprocessing.com/>

[Xcel Energy](#): Residential systems up to 10KW receive \$2.55/watt. For further information including commercial rebate programs go to http://www.xcelenergy.com/Colorado/Residential/RenewableEnergy/Solar_Rewards/Pages/home.aspx
